

The Effects of AI on Christianity

This presentation will go over the bad effects on faith because of manipulative fake AI media.
By [lelbois](#)

Authenticity

Some social media users use fake AI generated photos of Jesus to get profit. Underage children on social media platforms often believe images at face value, And if they believe these AI generated photos are real, It could mess up their representation of Jesus Christ.

1 Timothy 6:5 (NIV):

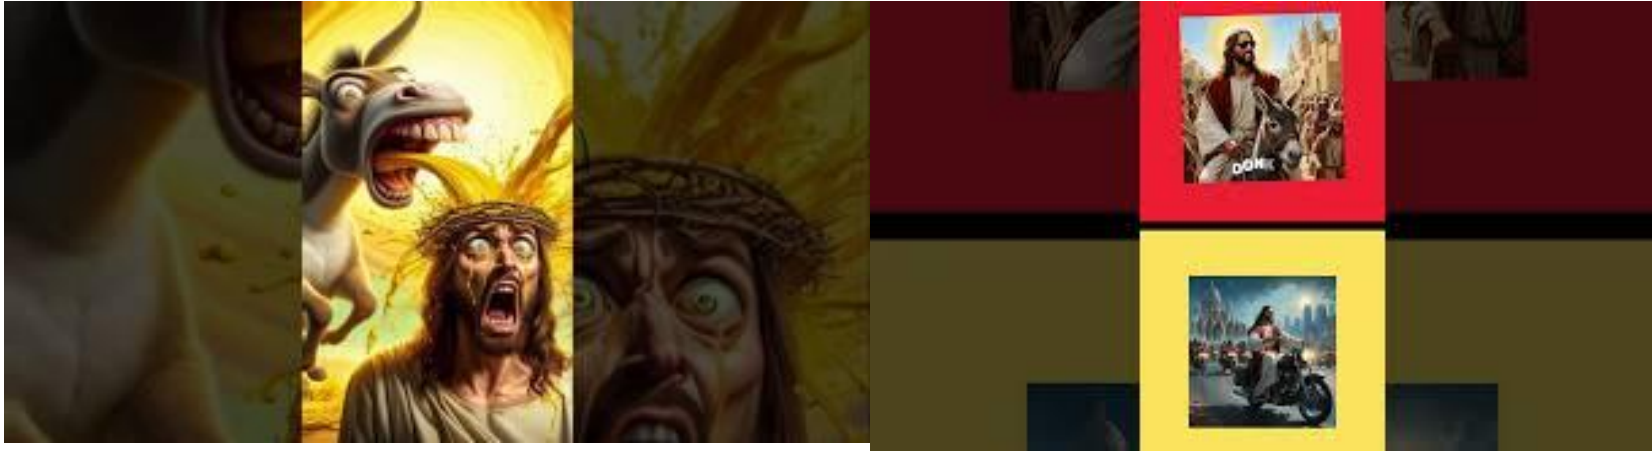

"...and constant friction between men of corrupt mind, who have been robbed of the truth and who think that godliness is a means to financial gain."

Examples:

These videos also seem to use the exact same description too.

“This video will pose a series of provocative and controversial questions, exploring the actions and decisions Jesus might take in various hypothetical situations.”

They intentionally make the description under 250 characters so AI detectors won't accept it.

Manipulation

Most people also use these AI generated photos to manipulate children into liking and subscribing their video, they will usually do something that says “Like and subscribe if you love Jesus. If you scroll, then you love the devil.” This is not true and you can still have a relationship with Jesus Christ without liking and subscribing to their Channel. Sometimes they don't use AI. Young children could potentially believe that this is true and they could potentially end up making the channel money off of their method.

2 Peter 2:1-3 (NIV): *"But there were also false prophets among the people, just as there will be false teachers among you. They will secretly introduce destructive heresies, even denying the sovereign Lord who bought them—bringing swift destruction on themselves. Many will follow their depraved conduct and will bring the way of truth into disrepute. In their greed these teachers will exploit you with fabricated stories."*

Examples

The “Jesus Shrimp Photos”

This slide is about a series of fake AI generated photos posted on Facebook that would represent Jesus being covered with shrimps or Jesus having the lower half of his body being a shrimp. Some people who can't tell the difference between AI believe these photos are real. The photos will be displayed underneath:

Conclusion

Ai generated photos of Jesus Christ are bad of for faith and could trick little kids who don't know how to detect AI photos into believing they are real causing a distorted perception of Jesus Christ.
